

Rag Doll: A Horrotica Novel By Mathew Klickstein When this conflicted milquetoast discovers a nubile young girl sprawled out and unconscious in an alleyway one night he decides to take the foundling home with him to nurture her back to health and consciousness. Oliver soon realizes that in order to take care of his mysteriously cataleptic housemate - the sudsy bubble baths the muscle massages the incessant combing of her silken blonde hair - he will need to indulge in extracurricular sexual diversions to keep from inflicting himself on the gamine's tender vulnerable body. He's also one of the most caring young men you could ever hope to meet: In his own words he both loves and hates women with equal intensity confessing Some girls I hate so much I have to see them naked, If you think Oliver Maxwell is complicated just wait until you read about his sex life: There begins a litany of progressively perverted episodes for a boy whose fantasies might be others' nightmares. For Oliver Maxwell (and the various paramours he comes upon during his nocturnal meanderings) experimentation is only the beginning, He craves the fear as much as the fantasy and knows he's not the only one, Along the way Oliver finds his lost angel in a coma might not be as innocent as he presupposed: English This was well written but a little too dark for my tastes. In researching different forms of erotica I found this to be very gritty and in a style that might better appeal to men[1]

Oliver Maxwell is demented depraved and disturbed. and vice versa. Rag Doll: A Horrotica Novel Twisted dark and gripping. An irresistible read. English
